far beyond ordinary

far beyond ordinary

TODAY IS NO ORDINARY DAY

Look around.

Blue skies, wide with potential.

Green fields, full of opportunity.

Nothing is out of bounds.

It's the perfect day to make something perfect,
decide it's not perfect and rework it, until it is.

Perfect.

So much to do.

I will make light, lighter and effort, effortless.

I will make shapes that have never been shaped before.

I will turn wood into graphite, and graphite into gold.

And when I'm done,

I will be pleasantly surprised that I've done it again.

Yes, today is no ordinary day.

Today will be the greatest day of my life's work.

Until, perhaps, tomorrow.

A SCIENTIFICALLY SWEETER SPOT

ISOMETRIC™

SIGNATURE YONEX TECHNOLOGY SINCE 1980*

ISOMETRIC™ technology was invented by Yonex to maximize the vital sweet spot area and is now a world-leading feature of our racquets. The squareshaped head of the racquet means that there are more strings crossing at right angles, resulting in a bigger sweet spot. Yonex continues to develop and enhance ISOMETRIC™ power, reducing still further the 'inert' space around the edge of conventional racquets, creating a far bigger sweet spot than other frames.

ISOMETRIC™ is a trademark of Yonex Co., Ltd. *Tested by Yonex

*Originally developed for tennis racquets, in 1992 Yonex released the first ISOMETRIC badminton racquet.

ASTROX

STEEP ATTACK

The ASTROX series is developed to meet the demands of aggressive attacking play, taking the point to your opponent with relentless steep attacks.

The Rotational Generator System perfectly distributes weight through the grip end, frame top and the T-joint for maximum control, enabling smooth transition between shots, in a rapid succession. Revolutionary graphite materials such as Namd* are utilized to produce more flex and faster snapback for imposing power.

- Beginner to intermediate players with basic skills
- ◐ Intermediate to advanced players with developing skills
- Advanced players with enhanced skills

ASTROX 88S

ASTROX 88D

NEW ISOMETRIC HEAD SHAPE

The iconic ISOMETRIC head shape is enhanced* for a larger sweet spot. Frame sides are strategically reinforced with wider areas for a stronger construct.

*PRO and TOUR series only

ROTATIONAL GENERATOR SYSTEM

By applying the counterbalance theory, weight is distributed throughout the grip end, frame top and the T-joint for a rapid succession of powerful shots.

The Rotational Generator System is elevated with the proprietary, lighter yet stronger VOLUME CUT RESIN, which made intricate weight control possible.

NEW GROMMET CONSTRUCT

Frame sides employ a new grommet shape with a larger diameter, allowing more string movement for increased shuttle hold and control.

NANOFLARE

RAPID FIRE

Engineered to improve swing speed and maneuverability, the NANOFLARE is the only head-light racquet proven to provide unrivaled power and increased shuttle acceleration.

The difference is in the technology – built for speed, the NANOFLARE, is constructed with the SONIC FLARE SYSTEM which strategically lines high modular graphite material at the top and bottom of the frame for amplified repulsion performance.

- Beginner to intermediate players with basic skills
- ◐ Intermediate to advanced players with developing skills
- ◑ Advanced players with enhanced skills

NANOFLARE 800LT

RAPID FIRE

RAZOR FRAME

Engineered for speed, Yonex's slimmest ever frame slices through the air for faster swing speeds.

SONIC FLARE SYSTEM

The revolutionary new graphite material M40X* and EX-HMG provide unrivaled power and stability for maximum shuttle acceleration.

* TORAYCA® M40X is a next-generation carbon graphite, developed by Toray Industries, Inc., for the ultimate combination of high strength and high elastic modulus.

5U WEIGHT MODEL

78 gram model for advanced, agile maneuverability.

VDM Vibration Dampening Mesh

VDM is lined into the tip of the frame, controlling unwanted vibration and ultimately improving shuttle hold and feel.

DUORA

DUAL IMPACT

With two contrasting racquet profiles built into one frame, the DUORA is designed to bring an all-around blend of power, speed and control to a player's game. Combining technology that enhances both forehand and backhand swings, the DUAL OPTIMUM SYSTEM remains sleek in design. Constructed with NANOMETRIC DR*, a lightweight graphite material weighing 60% less than conventional graphite, the DUORA offers players unparalleled swing speed, firmer shuttle hold, and enhanced repulsion for explosive shots.

DUORA -STRIKE

DUORA GROMMET DESIGN

8 linked grommets made with differing thicknesses on either side of the frame. The stiffer AERO side grommets pull the string harder for increased power.

NANOMETRIC

NANOMETRIC DR

NANOMETRIC DR is an enhanced graphite based on unique NANOSCIENCE technology for a firm shuttle hold creating maximum repulsion.

DUAL OPTIMUM SYSTEM

Two contrasting racquet profiles in one unique Dual Dynamic Design allow players to enhance both their forehand and backhand. Command the court with powerful forehands and speedy backhands.

NANOSCIENCE

NANOSCIENCE technology allows Yonex to alter the structure of materials in a racquet to enhance the **STRENGTH, FLEX and POWER**.

Namd

A world-first, new dimension graphite material, Namd, produces more flex with a faster snapback, unleashing dramatic power. (Namd is a technology developed by Nitta Co., Ltd.)

NANOAIR SPRING

Tiny air pockets within the graphite improve energy transfer to the shuttle.

NANOCELL NEO

A resilient yet surprisingly flexible graphite material providing increased power.

NANOMESH NEO

Ensures a stronger more flexible frame, while increased shaft flex creates maximum power.

NANOMETRIC

Tightly bonded fibers enhance the racquet's strength and minimize twisting during impact. NANOMETRIC is a material which applies the NANOALLOY™ technology of Toray Industries, Inc.

NANOMETRIC DR

An enhanced graphite based on unique NANOSCIENCE technology for a firm shuttle hold creating maximum repulsion.

NEO CS CARBON NANOTUBE

Offering greater flexibility, great durability and repulsion power, NEO CS CARBON NANOTUBE delivers outstanding performance when you need to hit powerful, controlled shots.

M40X

A next-generation highly strong, yet elastic carbon fiber developed by Toray Industries, Inc. (TORAYCA® M40 X is developed by Toray Industries, Inc.)

X-FULLERENE

Used in the resin which bonds the carbon fibers, resulting in a tenfold increase in binding force which makes it possible to create 5% higher repulsion power and 15% greater stability than conventional graphite.

MATERIAL HIGHLIGHTS

HYPER-MG/EX-HMG/SUPER HMG

These ultra-elastic materials produce sharper power for all shots.

IC ELASTOMER

This soft Elastomer material increases dwell time for greater power transfer to the shuttle.

LIGHT FEEL CARBON NEO

The additional rubber creates a lighter feel and increased flex for greater head speed.

NICKEL-TITANIUM FIBER

Increased stiffness and frame shape retention ensures quick fire power.

REXIL FIBER

Increases repulsion power to the shuttle while minimizing shock at impact.

SONIC METAL

Situated in the lower frame for aggressive snapback power with an attacking sound.

T-ANCHOR

Increases stiffness for quicker racquet recovery into the next shot.

TUNGSTEN

A metal with a high tensile strength.

VDM [VIBRATION DAMPENING MESH]

Vibration dampening material is a stretchy mesh rolled with the graphite to greatly reduce unwanted vibrations.

VIBSLAYER CARBON

Incorporated into the bottom half of the frame for extra distance on clears in combination with reduced shock impact, fatigue and stress on the body. VIBSLAYER CARBON utilizes materials made by Toray Industries, Inc.

BLACK MICRO CORE

A stiff, high-density vibration-dampening material featured in the upper half of the frame, allowing players to hit with a solid feel and power.

FRAME

AERO FRAME

Cuts air resistance for faster swing speeds and increased maneuverability.

AERO+BOX FRAME

A combination of faster swing speeds and a solid feel.

BOX FRAME

The extra stiff profile provides a solid stable feel on impact with the shuttle.

COMPACT FRAME

Reduced air resistance and improved feel with the shuttle.

DUAL OPTIMUM SYSTEM

Two contrasting racquet profiles in one unique Dual Dynamic Design allow players to enhance both their forehand and backhand.

DUORA GROMMET DESIGN

8 linked grommets made with differing thickness on either side of the frame. The stiffer AERO side grommets pull the string harder for increased power.

DURA FRAME

Provides aluminium frames with greater strength and a solid feel.

HORIZONTAL-A CONCEPT

Larger sweet spot at the top of the frame in a compact head design.

ISOMETRIC™

Increases the size of your sweet spot.

MUSCLE POWER FRAME

Smoother grommets reduce string stress for greater durability.

ROTATIONAL GENERATOR SYSTEM

By applying the counterbalance theory, weight is distributed throughout the grip end, frame top and the joint for maximum control. The transition to the next shot can be performed smoothly with a rapid succession.

SBZ (SNAPBACK ZONE)

The slimmer section of racquet frame flexes at impact for greater shuttle speeds.

SOLID FEEL CORE

Reduces vibrations traveling down the shaft for improved comfort.

SONIC FLARE SYSTEM

Carefully selected high modulus graphite are strategically placed across the bottom of the frame to provide unrivalled power and stability for maximum shuttle acceleration.

TRI-VOLTAGE SYSTEM

A combination of intelligent head weighting, frame flex and aerodynamics generates explosive force without compromising on speed or control.

VERTICAL-A CONCEPT

Vertical grommets provide greater flex in the string bed and a wider sweet spot.

JOINT

BUILT-IN T-JOINT

Increases strength between the frame and shaft eliminating head twist for more control.

NEW BUILT-IN T-JOINT

The lightweight T-Joint increases stability of the shuttle on the strings, maximizing power and control.

SHAFT

HYPER/EXTRA/ULTRA/SUPER SLIM SHAFTS

Designed to slice through the air, generating speedy power.

ULTRA PEF

Lightweight fibers that withstand immense forces while absorbing unwanted shock and vibrations.

CAP

ENERGY BOOST CAP/PLUS

Uniquely shaped cap which maximizes shaft performance. The front allows the shaft to flex, while the sides arch-shaped curve stabilizes the racquet face by preventing the shaft from twisting.

CONTROL SUPPORT CAP

Wider, flatter surface improves grip for increased racquet control.

STRENGTH IN STRINGS

Choosing the right string is as important as choosing the right racquet. That is why Yonex engineers put so much effort into designing innovative new products like the EXBOLT, a next-generation multifilament string. The EXBOLT is engineered with the proprietary FORGED FIBER, a thin yet radically durable outer, allowing the player to pierce through their opponent's defense with agile and high-velocity drives.

Innovation lies in the smallest details. Yonex never stops meticulously testing cutting-edge fibers and coatings, finding more efficient ways to craft stronger strings for every performance preference and level of play.

CONTROL

AEROBITE, the first ever hybrid badminton string, has braided threads which create a robust string structure, and its polyurethane coating gives more hold on the shuttle. It is the ideal string for advanced players.

DURABILITY

The BG65 Titanium delivers a hard feeling from the Hydro Titanium coating to provide a sharp but comfortable feel. The NANOGY 95, with its CUP-STACK CARBON NANOTUBE advanced construction to reduce notching of the strings, increases speed. These strings are perfect for improving control and increasing durability, especially for hard-hitting players.

QUICK REPULSION

The EXBOLT63 introduces a ground-breaking outer called FORGED FIBER, a fiber so thin yet radically durable that it produces high repulsion and dynamic hitting sounds. If you are looking to catch your opponent off-guard with high velocity drives that pierce through their defense, the EXBOLT63 is a select for you.

CONSISTENCY IN FLIGHT

Since 1965, Yonex has manufactured feather shuttlecocks widely known to deliver a consistent stable flight, and class leading durability. Manufactured with incredible attention to detail, players can trust in a quality shuttle that performs the same every time.

In addition to BWF major events and other leading tournaments, Yonex will provide shuttlecocks for Olympic and Paralympic Games Tokyo 2020 Badminton Competition.

FEATHER SHUTTLECOCKS

Yonex has been meticulously hand-crafting the best feather shuttlecocks in the world since 1965. Each of our shuttles is assembled by a team of expert craftsmen using the finest materials. They are then individually tested to make sure they deliver consistent flight trajectory, accuracy and distance at all temperatures. That's why the best players and the biggest tournaments in the world choose Yonex shuttlecocks.

*Shuttlecock performance can vary by altitude, so please consult with your local retailer or distributor.

NYLON SHUTTLECOCKS

Outdoor or indoor, Yonex precision MAVIS nylon shuttlecocks are the closest you can get to a traditional feather. Designed to have the same flight time as a feather shuttle, they give an accurate and durable performance with a traditional feel.

The hardness of the skirt – the feather part of the nylon shuttlecock – varies depending on temperature.

WING RIB™

WING RIB™

The WING RIB design utilizes air flow through the shuttlecock to restore shape quickly on impact. Based on flight dynamics, this original design grants stable flight, contrary to conventional models that restore shape via stiff construction.

The WING RIB design is featured in MAVIS 2000 and MAVIS 600.

CLOTHING TECHNOLOGY

VERYCOOL DRY

KEEP COOL, DRY AND ON TOP OF YOUR GAME

A special hydrophobic fiber moves moisture from the skin to the fabric's surface. Along with its quick drying property, VERYCOOL DRY keeps you cool and dry at all times.

VERYCOOL

A COOL WAY TO BEAT THE HEAT

By using cooling material Xylitol, VERYCOOL clothing from Yonex absorbs heat and perspiration, providing a significant cooling effect during exercise. No matter what the ambient temperature, VERYCOOL lowers body heat by 3°C for cooler play*.

*Data from Unitika Garments Technology & Research Laboratories Ltd.

UV REDUCTION

OUTSTANDING ULTRAVIOLET INTERCEPTION

Yonex clothing intercepts infrared radiation and approximately 92%* of ultraviolet, minimizing heat build-up during play.

*Tested by BOKEN QUALITY EVALUATION INSTITUTE.

ANTISTATIC

AVOID THE DISCOMFORT OF STATIC ELECTRICITY

Carbon impregnated conductive fibers are woven into the clothing to remove static electricity build-up.

POWER SLEEVE

SMOOTHER ARM MOVEMENT WHEN IN ACTION

Affording a 165° range of motion in the sleeves, our shirts boast less restriction and free movement.

POLYGIENE

STAY FRESH AND ODOR-FREE

Woven into the fabric, this odor control tech keeps you fresh and odor-free even after intense play.

STRETCH

FLEXIBLE, FORGIVING AND FASHIONABLE

Innovative stretch material allows for free movement that supports your active play.

SWEAT ABSORBENT AND QUICK DRYING

STAY DRY AND LIGHT

Fabric that wicks away moisture and keeps you dry.

Air-Release

AIR RELEASE

SUPERIOR COMFORT IN THE HEAT

As warm air rises, cold air enters into open areas. Based on this fact, new Yonex Air Release technology has greatly improved ventilation in our shirts. Mesh in the back of the neck provides high ventilation, pushing out body heat. Meanwhile, fresh air is taken in through mesh equipped on the side of the shirt from the bottom to the armpits, keeping you cool under severe heat.
