CHASING HIGHER PERFORMANCE THROUGH
CRAFT AND INNOVATION SINCE 1946.

far beyond ordinary

THIS IS YONEX

Our first wooden racquet launched in 1957.

A lot has changed. But our spirit hasn't.

After all, mastery is the pursuit.
Practice is the joy.
Refining.
Crafting.
Innovating.
Accelerating.
Warming up, cooling down.
Changing this, tightening that.
It's a dance. A compulsion. A legacy. A pulse.

Because a gram here, a millimeter there can be the difference between falling one step behind and rising, reaching, racing to the top.

At the intersection of craft and technology, precision and strength, that's where you will find us.

Forever pushing the edge, crafting the dream, and chasing the spirit of sport.

RACQUETS

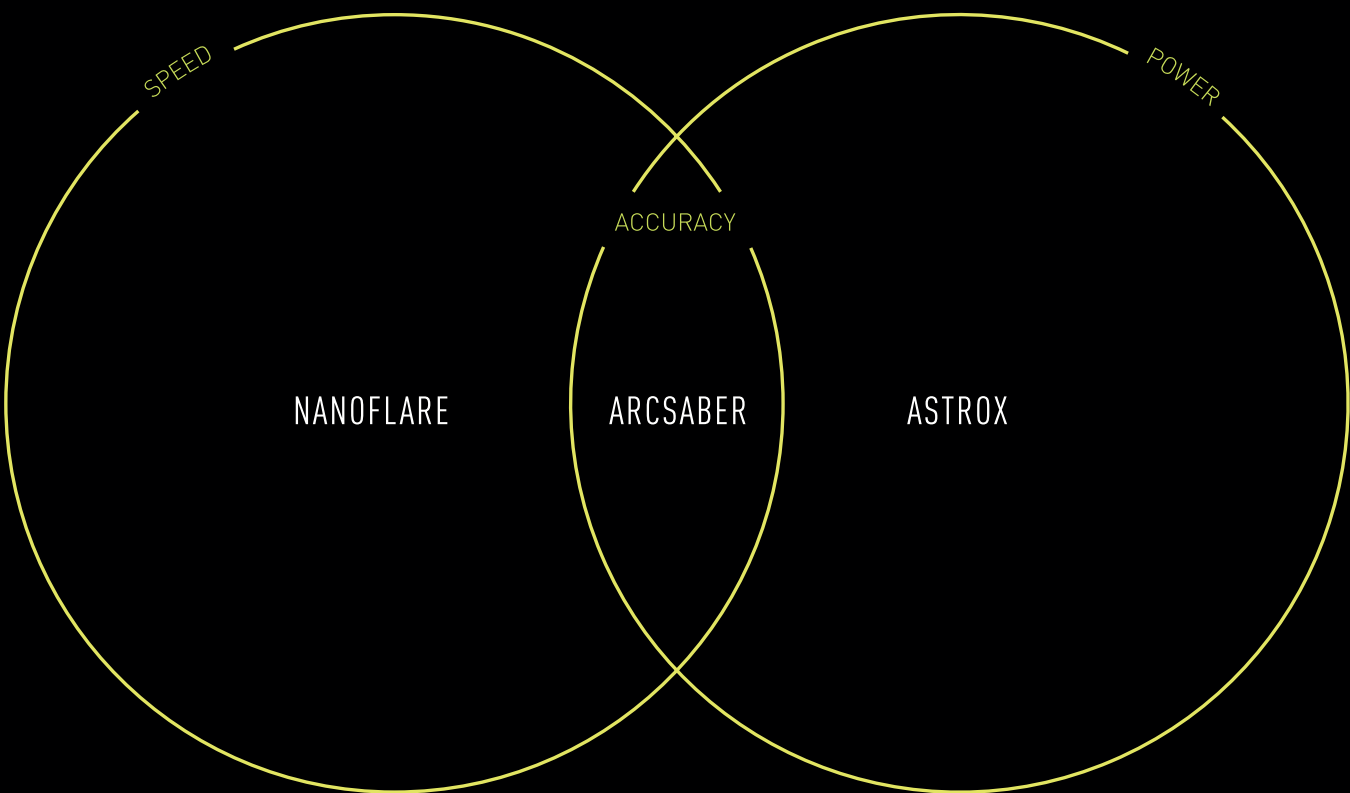

Badminton racquets were the start of the Yonex journey into sports. With each racquet developed, our vision became clearer. We learned the fun of crafting world-class racquets alongside the most elite players and now, we strive for innovative racquets that help every athlete achieve new speeds and new heights.

We believe the best performance cannot be prepared with just any ingredient. Every gram, every millimeter can be the deal-maker or -breaker. That's why we source the highest quality advanced graphite for our chefs to personally cook up into each individual masterpiece.

ISOMETRIC™

SIGNATURE YONEX TECHNOLOGY SINCE 1980*

ISOMETRIC™ technology was invented by Yonex to maximize the vital sweet spot area and is now a world-leading feature of our racquets. The squareshaped head of the racquet means that there are more strings crossing at right angles, resulting in a bigger sweet spot. Yonex continues to develop and enhance ISOMETRIC™ power, reducing still further the 'inert' space around the edge of conventional racquets, creating a far bigger sweet spot than other frames.

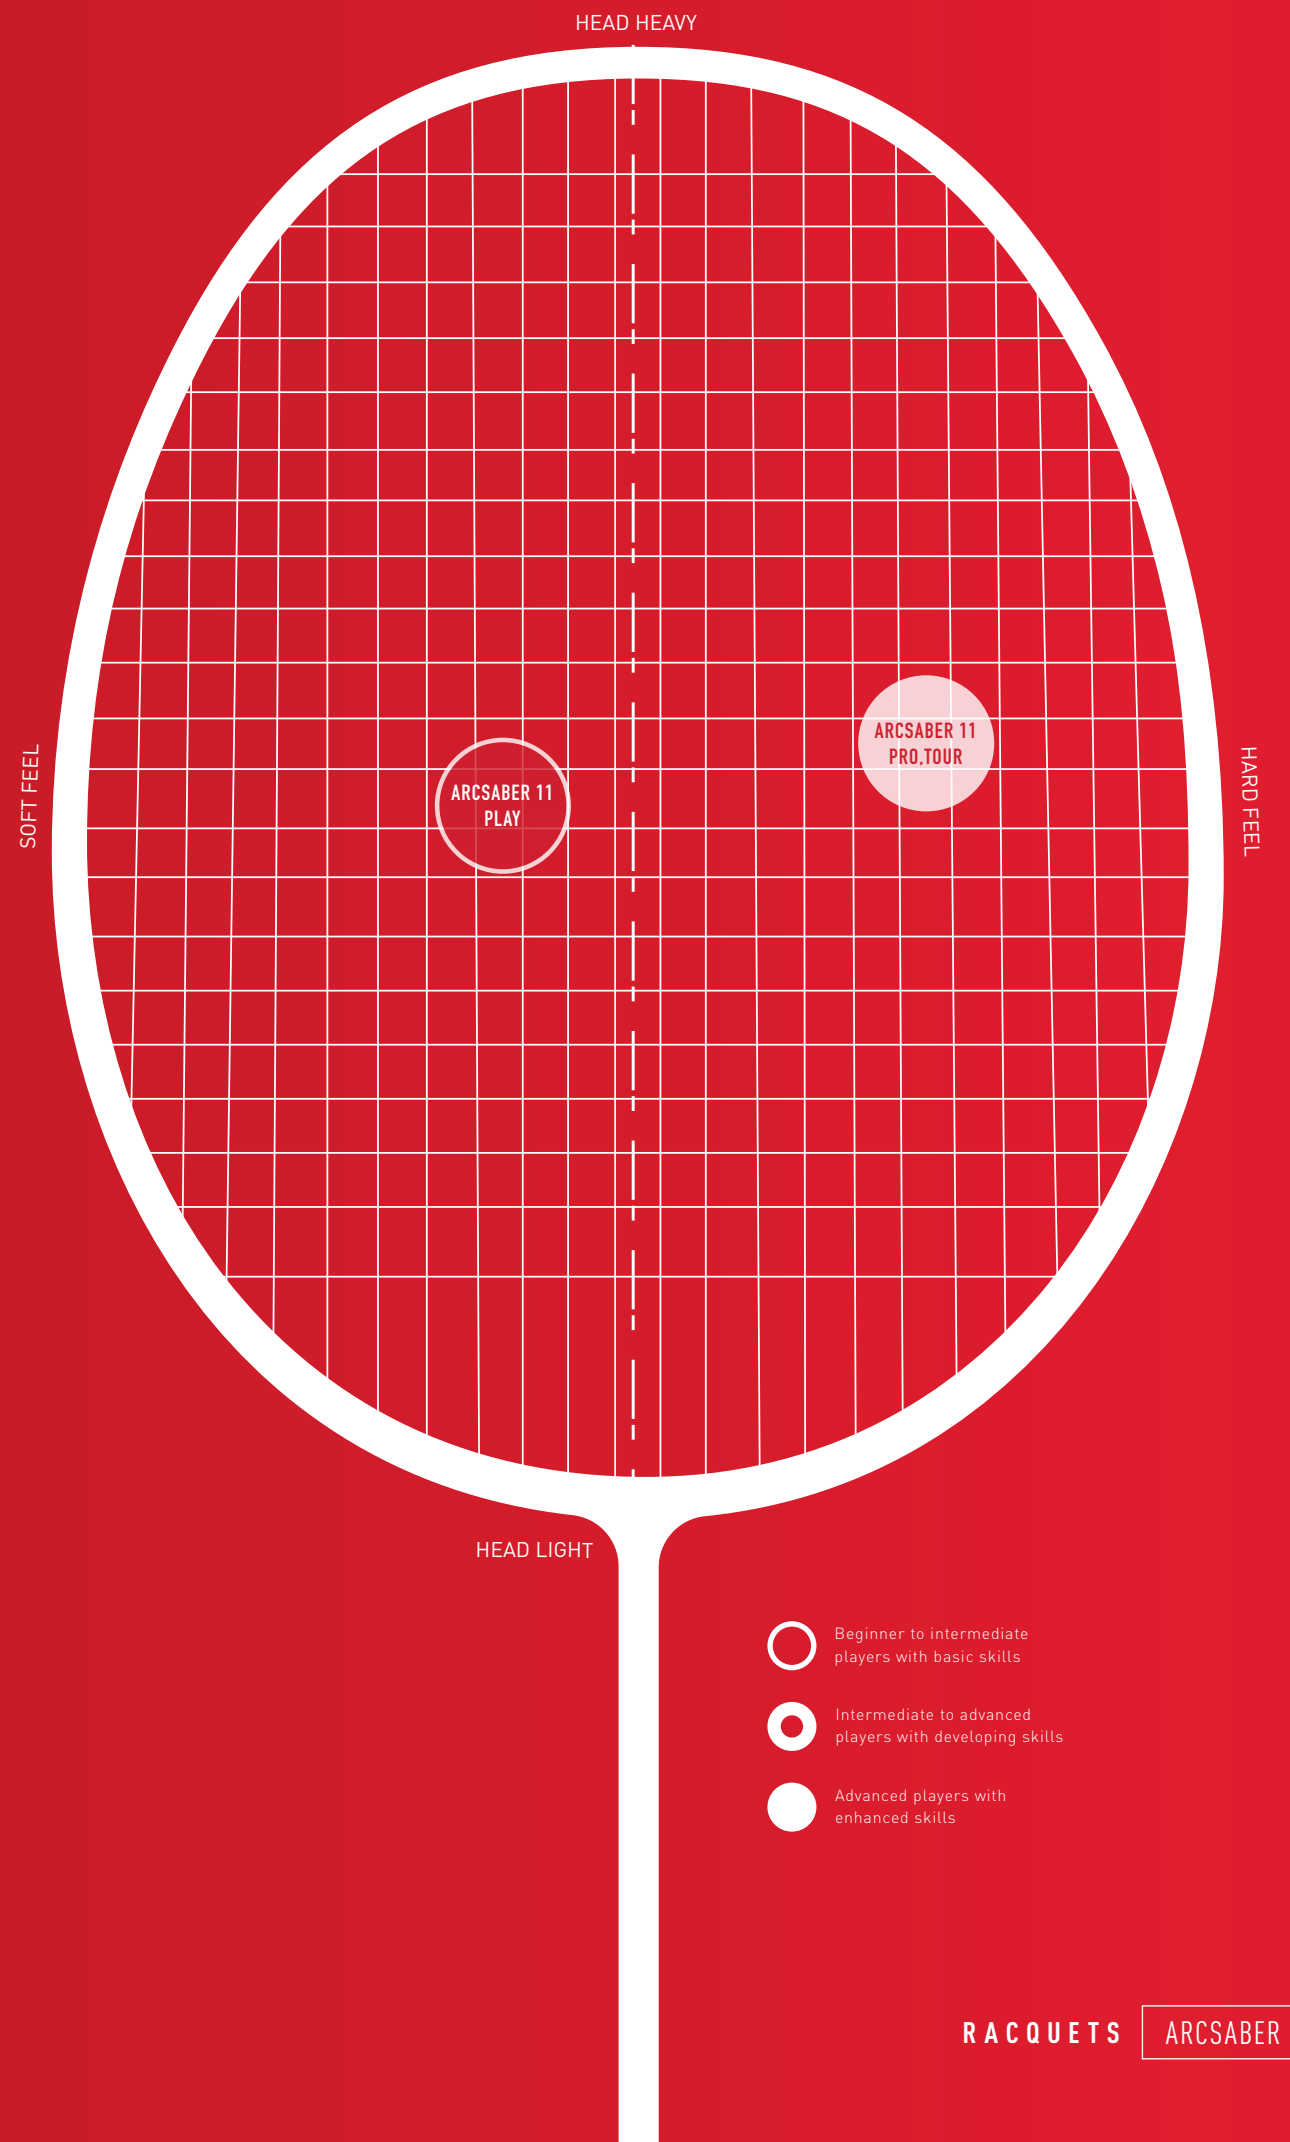

ISOMETRIC™ is a trademark of Yonex Co., Ltd. *Tested by Yonex

*Originally developed for tennis racquets, in 1992 Yonex released the first ISOMETRIC badminton racquet.

ARCSABER

The acclaimed ARCSABER series designed for control is reimagined with emphasized shuttle-pocketing for a controlled offense and one-of-a-kind feel at impact.

Taking control of the court can come in all different forms. For the ARCSABER, that comes from the extra few milliseconds of shuttle contact time allowing assertive shot-making. Combine that with the stability of the enhanced ARCSABER frame, you gain the confidence to command the court.

CONTROL-ASSIST
BUMPER

The CONTROL-ASSIST BUMPER attached at the top contains T-ANCHOR, micro-sized tetrapods that help lock in vertical strings for improved accuracy.

ENHANCED ARCSABER
FRAME

Control with confidence through this unique frame structure with varying levels of flex from top, sides, to bottom, built to increase shuttle hold while reducing instability and twisting at impact.

POCKETING BOOSTER

The frame is lined with POCKETING BOOSTER, a proprietary rubber-like material emphasizing elasticity in the frame's flex.

ASTROX

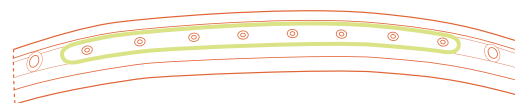

STEEP ATTACK

The ASTROX series is developed to meet the demands of aggressive attacking play, taking the point to your opponent with relentless steep attacks.

The Rotational Generator System perfectly distributes weight through the grip end, frame top and the T-joint for maximum control, enabling smooth transition between shots, in a rapid succession. Revolutionary graphite materials such as Namd* are utilized to produce more flex and faster snapback for imposing power.

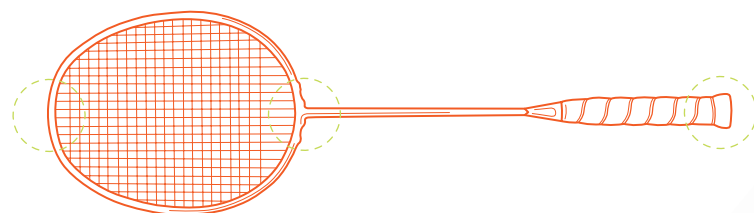

ASTROX 99

POWER-ASSIST BUMPER

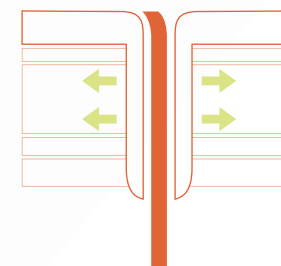

Boosted power with a tungsten-infused weighted bumper, adding 55% more weight* than conventional grommets. The POWER-ASSIST BUMPER enhances the Rotational Generator System, quickly transferring more weight to the shuttle.

* Measured by Yonex

ROTATIONAL GENERATOR SYSTEM

Intricate weight distribution technology designed with the counterbalance theory that allows head-heavy racquets to recover faster between shots.

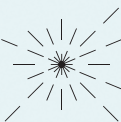

WIDE DIAMETER GROMMETS

Control the shuttle-release timing with larger grommets designed for more string movement, extending the shuttle contact time.

NANOSCIENCE

NANOSCIENCE technology allows Yonex to alter the structure of materials in a racquet to enhance the **STRENGTH, FLEX and POWER**.

Namd

A world-first, new dimension graphite material, Namd, produces more flex with a faster snapback, unleashing dramatic power. (Namd is a technology developed by Nitta Co., Ltd.)

NANOCELL NEO

A resilient yet surprisingly flexible graphite material providing increased power.

NANOMESH NEO

Ensures a stronger more flexible frame, while increased shaft flex creates maximum power.

NANOMETRIC

Tightly bonded fibers enhance the racquet's strength and minimize twisting during impact. NANOMETRIC is a material which applies the NANOALLOY™ technology of Toray Industries, Inc.

NANOMETRIC DR

An enhanced graphite based on unique NANOSCIENCE technology for a firm shuttle hold creating maximum repulsion.

M40X

A next-generation highly strong, yet elastic carbon fiber developed by Toray Industries, Inc. (TORAYCA® M40 X is developed by Toray Industries, Inc.)

X-FULLERENE

Used in the resin which bonds the carbon fibers, resulting in a tenfold increase in binding force which makes it possible to create 5% higher repulsion power and 15% greater stability than conventional graphite.

MATERIAL HIGHLIGHTS

HYPER-MG / EX-HMG / SUPER HMG

These ultra-elastic materials produce sharper power for all shots.

IC ELASTOMER

This soft Elastomer material increases dwell time for greater power transfer to the shuttle.

LIGHT FEEL CARBON NEO

The additional rubber creates a lighter feel and increased flex for greater head speed.

REXIL FIBER

Increases repulsion power to the shuttle while minimizing shock at impact.

SONIC METAL

Situated in the lower frame for aggressive snapback power with an attacking sound.

T-ANCHOR

Increases stiffness for quicker racquet recovery into the next shot.

TUNGSTEN

A metal with a high tensile strength.

VDM (VIBRATION DAMPENING MESH)

Vibration dampening material is a stretchy mesh rolled with the graphite to greatly reduce unwanted vibrations.

BLACK MICRO CORE

A stiff, high-density vibration-dampening material featured in the upper half of the frame, allowing players to hit with a solid feel and power.

POCKETING BOOSTER

A proprietary rubber-like material emphasizing elasticity in the frame's flex.

FRAME

AERO FRAME

Cuts air resistance for faster swing speeds and increased maneuverability.

AERO+BOX FRAME

A combination of faster swing speeds and a solid feel.

BOX FRAME

The extra stiff profile provides a solid stable feel on impact with the shuttle.

COMPACT FRAME

Reduced air resistance and improved feel with the shuttle.

DUAL OPTIMUM SYSTEM

Two contrasting racquet profiles in one unique Dual Dynamic Design allow players to enhance both their forehand and backhand.

DUORA GROMMET DESIGN

8 linked grommets made with differing thickness on either side of the frame. The stiffer AERO side grommets pull the string harder for increased power.

DURA FRAME

Provides aluminium frames with greater strength and a solid feel.

HORIZONTAL-A CONCEPT

Larger sweet spot at the top of the frame in a compact head design.

ISOMETRIC™

Increases the size of your sweet spot.

MUSCLE POWER FRAME

Smoother grommets reduce string stress for greater durability.

ROTATIONAL GENERATOR SYSTEM

By applying the counterbalance theory, weight is distributed throughout the grip end, frame top and the joint for maximum control. The transition to the next shot can be performed smoothly with a rapid succession.

SBZ (SNAPBACK ZONE)

The slimmer section of racquet frame flexes at impact for greater shuttle speeds.

SOLID FEEL CORE

Reduces vibrations traveling down the shaft for improved comfort.

SONIC FLARE SYSTEM

Carefully selected high modulus graphite are strategically placed across the bottom of the frame to provide unrivalled power and stability for maximum shuttle acceleration.

TRI-VOLTAGE SYSTEM

A combination of intelligent head weighting, frame flex and aerodynamics generates explosive force without compromising on speed or control.

VERTICAL-A CONCEPT

Vertical grommets provide greater flex in the string bed and a wider sweet spot.

POWER-ASSIST BUMPER

Boosted power with a tungsten-infused weighted bumper, adding 55% more weight than conventional grommets. The POWER-ASSIST BUMPER enhances the Rotational Generator System, quickly transferring more weight to the shuttle.

CONTROL-ASSIST BUMPER

The CONTROL-ASSIST BUMPER attached at the top contains T-ANCHOR, micro-sized tetrapods that help lock in vertical strings for improved accuracy.

JOINT

BUILT-IN T-JOINT

Increases strength between the frame and shaft eliminating head twist for more control.

NEW BUILT-IN T-JOINT

The lightweight T-Joint increases stability of the shuttle on the strings, maximizing power and control.

SHAFT

REXIS SHAFT

A high-performance shaft precisely designed with an original Yonex molding technique. Improves shot performance and dominates the game.

HYPER / EXTRA / ULTRA / SUPER SLIM SHAFTS

Designed to slice through the air, generating speedy power.

ULTRA PEF

Lightweight fibers that withstand immense forces while absorbing unwanted shock and vibrations.

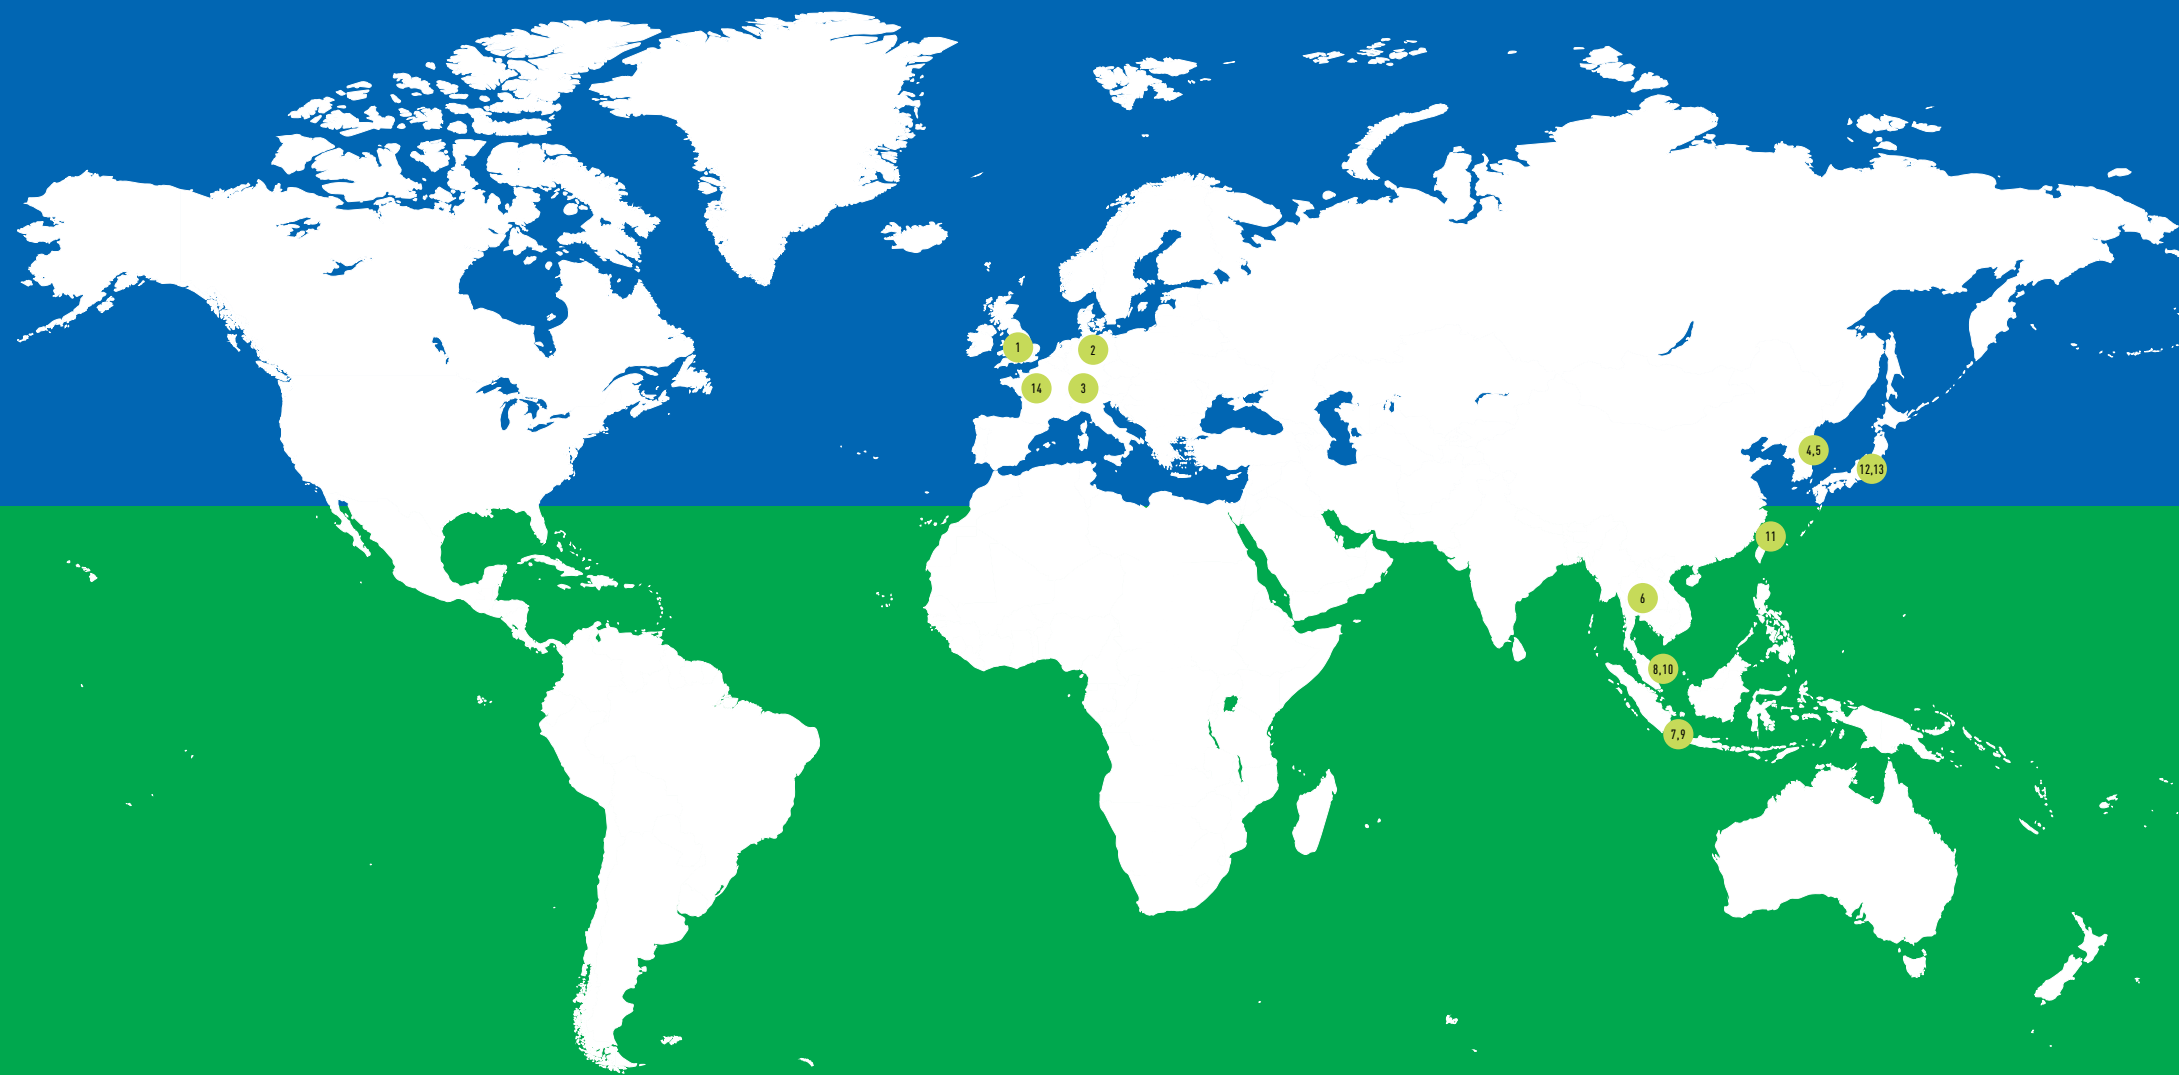

CAP

ENERGY BOOST CAP / PLUS

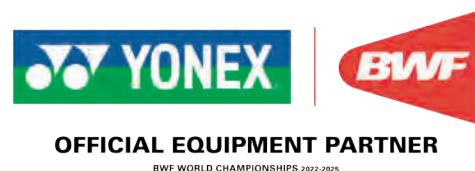

Uniquely shaped cap which maximizes shaft performance. The front allows the shaft to flex, while the sides arch-shaped curve stabilizes the racquet face by preventing the shaft from twisting.

CONTROL SUPPORT CAP

Wider, flatter surface improves grip for increased racquet control.

OUR RANGE OF —

STRINGS

Choosing the right string is as important as choosing the right racquet. That is why Yonex engineers put so much effort into designing innovative new products like the EXBOLT, a next-generation multifilament string. The EXBOLT is engineered with the proprietary FORGED FIBER, a thin yet radically durable outer, allowing the player to pierce through their opponent's defense with agile and high-velocity drives.

Innovation lies in the smallest details. Yonex never stops meticulously testing cutting-edge fibers and coatings, finding more efficient ways to craft stronger strings for every performance preference and level of play.

CONTROL

AEROBITE, the first ever hybrid badminton string, has braided threads which create a robust string structure, and its polyurethane coating gives more hold on the shuttle. It is the ideal string for advanced players.

DURABILITY

The BG65 Titanium delivers a hard feeling from the Hydro Titanium coating to provide a sharp but comfortable feel. The NANOGY 95, with its CUP-STACK CARBON NANOTUBE advanced construction to reduce notching of the strings, increases speed. These strings are perfect for improving control and increasing durability, especially for hard-hitting players.

QUICK REPULSION

The EXBOLT63 introduces a ground-breaking outer called FORGED FIBER, a fiber so thin yet radically durable that it produces high repulsion and dynamic hitting sounds. If you are looking to catch your opponent off-guard with high velocity drives that pierce through their defense, the EXBOLT63 is a select for you.

APPAREL

The science behind performance in apparel is deeper than can be imagined. Heat can slow you down, and sweat can hold you back. Our VERYCOOL technology lines fast-drying fibers with Xylitol, absorbing heat and sweat for a -3° cooling effect on the body. Stay cool and in the lead, even during the most heated of points at the end of the third game where nothing should be holding you back.

CLOTHING TECHNOLOGY

VERYCOOL DRY

KEEP COOL, DRY AND ON TOP OF YOUR GAME

A special hydrophobic fiber moves moisture from the skin to the fabric's surface. Along with its quick drying property, VERYCOOL DRY keeps you cool and dry at all times.

VERYCOOL

A COOL WAY TO BEAT THE HEAT

By using cooling material Xylitol, VERYCOOL clothing from Yonex absorbs heat and perspiration, providing a significant cooling effect during exercise. No matter what the ambient temperature, VERYCOOL lowers body heat by 3°C for cooler play*.

*Data from Unitika Garments Technology & Research Laboratories Ltd.

UV REDUCTION

OUTSTANDING ULTRAVIOLET INTERCEPTION

Yonex clothing intercepts infrared radiation and approximately 92%* of ultraviolet, minimizing heat build-up during play.

*Tested by BOKEN QUALITY EVALUATION INSTITUTE.

ANTISTATIC

AVOID THE DISCOMFORT OF STATIC ELECTRICITY

Carbon impregnated conductive fibers are woven into the clothing to remove static electricity build-up.

POLYGIENE

STAY FRESH AND ODOR-FREE

Woven into the fabric, this odor control tech keeps you fresh and odor-free even after intense play.

STRETCH

FLEXIBLE, FORGIVING AND FASHIONABLE

Innovative stretch material allows for free movement that supports your active play.

SWEAT ABSORBENT AND QUICK DRYING

STAY DRY AND LIGHT

Fabric that wicks away moisture and keeps you dry.

AIR RELEASE

SUPERIOR COMFORT IN THE HEAT

As warm air rises, cold air enters into open areas. Based on this fact, new Yonex Air Release technology has greatly improved ventilation in our shirts. Mesh in the back of the neck provides high ventilation, pushing out body heat. Meanwhile, fresh air is taken in through mesh equipped on the side of the shirt from the bottom to the armpits, keeping you cool under severe heat.

3D Power Graphite Sheet
Provides stability under the center of the foot and reduces shoe twist.

Power Graphite Drive
A graphite sheet is inserted along the sole for increased stability and to propel you forward to the next shot.

Power Graphite Lite
Improved stability and reduced twist on landing.

Power Graphite Sheet
Inserted in the midsole, the lightweight graphite sheet provides improved stability.

UPPER:

Durable Skin
Improves shape retention, durability and heat-resistance.

Durable Skin Light
A seamless construction offers natural comfort with an improved fit, eliminating discomfort from material friction.

Double Raschel Mesh
Highly breathable mesh for maximum ventilation.

Lateral Shell
Prevents foot movement at the edge of the sole for reduced power loss, allowing for fluid and aggressive footwork.

Ergoshape
The center of gravity is shifted to the large toe – for a comfortable fit and more speed.

Toe Assist Shape
Reduces pressure on the big toe while improving support at the mid-foot and heel for increased stability. Power loss is reduced for swift footwork.

Flexion Upper
Asymmetrical design with a curved eyelet creates a natural snug fit around the inner arch. Stress gets absorbed through the toes and instep for a more comfortable fit.

Inner Bootie
A flexible material from the metatarsal to the heel that produces a more gentle fit.

SOLE:

Hexagrip
Lightweight sole material that provides greater grip for agile stable footwork.

POWER CUSHION+
By improving shock absorption, our POWER CUSHION+ technology is designed for faster footwork that transforms impact into energy.

POWER CUSHION
A lightweight, impact-absorbing material developed independently by Yonex which quickly returns to its original shape after receiving a shock load, converting the shock energy into power for fast and light footwork.

Round Sole
For quick and smooth footwork ensuring maximum energy transfer into the next shot.

Radial Blade Sole
Designed for confidence in directional change. A proprietary sole pattern increasing traction in vertical, horizontal and diagonal movements.

Semi One-Piece Sole
Toe and heel rubber soles combined into a singular piece for improved stability, and for more traction through additional surface area.

MIDSOLE:

ToughBrid Light
Provides cushioning, shape retention and high elasticity whilst reducing shoe weight.

Hyper msLite
Lightweight midsole that still maintains it shape.

Feather Bounce Foam
A new lightweight cushioning material designed to provide an added bounce with each step.

INSOLE:

Synchro-Fit Insole
Reduces the gap between the foot and shoe with extra support around the heel, for maximum grip, comfort and performance.
